

## PRESS RELEASE

### H.C. Starck Tungsten's Goslar site certified according to EMAS

Goslar, GERMANY, February 27, 2023 – [H.C. Starck Tungsten Powders](#), a subsidiary of [Masan High-Tech Materials Group](#), has successfully introduced an environmental management system in accordance with the Eco-Management and Audit Scheme (EMAS) at its headquarters in Goslar, Germany. Following validation by TÜV Nord Cert in the fall of 2022, the company has now been entered in the EMAS register by the Hanover Chamber of Industry and Commerce.

EMAS is considered the world's most demanding system for environmental management. Certification confirms transparent and legally compliant implementation in accordance with the relevant EU regulation on a community eco-management and audit scheme in which organizations aiming to improve their environmental performance can participate voluntarily.

Management Systems Officer Markus Zumdick says: "Sustainability in a comprehensive sense has traditionally played a prominent role for our company, as reflected for example in our tungsten recycling for decades. The current EMAS certification underlines this attitude once again and demonstrates how professionally our teams deal with the issue."

#### About H.C. Starck Tungsten Powders

H.C. Starck Tungsten Powders is the world's leading manufacturer of high-quality tungsten powder tailored to individual customer needs. The company combines a century of experience in tungsten processing with high innovative power and technological expertise. Decades of experience in recycling and access to the world's largest tungsten reserves outside of China, owned by the company's parent group Masan High-Tech Materials, ensure stable supply with conflict-free raw materials. H.C. Starck Tungsten Powders employs around 560 people at three production sites in Germany, Canada and China plus sales offices in the U.S. and Japan. The company's headquarters is at its largest production site, in Goslar, Germany.
